For a full report on the Reach In-dia trip and training, please <u>click here for a</u> google slides presentation

- **36 tribal languages** were represented, most with 3-person teams. 35 teams completed the training. (A 1-person language team had to return home on the second day to assist his pregnant wife.)
- We had **pre-trained** half a dozen **mentors** to assist the language teams as they learned the app
- All language teams provided and used their own phones/devices (all of which were androids).
- The workshop **supplied 128 GB SD cards**, pre-loaded with templates, one per language team **to enable storage space** for this work to be done.
- Half of the teams represented (16 languages) have no Scripture materials available or accessible
 in their languages.
- 17 languages represented have a published paper NT available. No OT.

- Illiteracy rates are high.
- Three languages represented are state gateway languages of which we shall seek to make templates available for the 100s of other Bibleless languages and dialects.
- Cost to initiate each BT and/or SE language program in this context: \$350.
- About \$16,000 was raised for this training endeavor. About \$3000 was not spent and is still available in India for reaching out to train other language teams, perhaps via smaller more local workshops, within the next year

Let's keep spreading the Fire of his Word to the nations!
