

Provide Clean Water

Our vessel will desalinate ocean water into drinking water, at a rate of 120 gallons per hour!

This need is essential, after natural disasters like drought, a tsunami, volcanic eruptions, and cyclones!

WELLNESS

We deliver needed services and supplies. It's worth it!

Allison

Tiny Scratch Almost Ends in Tragedy.

"My right thigh became severely infected from a tiny scratch, but it took five days to arrange transport from the village. My pain was so bad; I could not walk. Eventually, a city doctor said I needed a flight to Australia. By then, the infection had engulfed most of my thigh. A fast response vessel could have reached our village quickly and saved me from seven reconstructive surgeries."

— Allison, Missionary, mother of three

Amputee

Amputees on remote islands in Melanesia receive very little assistance after surgery.

"The greatest challenge is large open-ocean distances to reach those in need. Vanuatu alone has 83 islands; people have little income or access to ocean transport on smaller islands. The best solution to help amputees is a mobile casting-clinic to visit islands, cast needed limbs, return to Port Vila to construct the limb, then return to an island to fit, modify, and mobility-train a patient."— Amputee Michael Shugg, Founder, Vanuatu Amputee Association

A Dedicated Support Vessel Changes...

EVERYTHING!

Get involved now:

- > Help **FUND** the Vessel
- > **PRAY** for the project and goals
- > **SHARE** with others

WHAT?

Serve translation, medical, and disaster needs. Deliver and retrieve outreach teams and supplies safely and quickly, with a multi-function, fast, ocean-going vessel.

> **Create a dedicated island ambulance service!**

WHY?

Island outreach teams struggle to reach communities in need. People need wellness programs, humanitarian aid, **Scripture engagement, literacy**, and sometimes physical rescue.

> **We need to send a Go Team!**

Join us. Help launch services in this hard-to-reach area.
